transfer NAVIGATOR

OUR ADVANTAGE

"After evaluating other solution alternatives, CFNC selected Decision Academic for its scalability, robust framework and integration capabilities. Transfer Navigator enables staff and faculty to easily manage articulation content resulting in the ability to provide state constituents with online access to quickly answer transfer inquiries and efficiently process approvals. The system will support transfer credit visibility between approximately 110 academic institutions from The University of North Carolina (comprised of 16 constituent institutions), the North Carolina Community College System (58 campuses), and the North Carolina Independent Colleges and Universities (comprised of 36 institutions)."

Press Release
Approved by CFNC

"Decision Academic was able to offer not only powerful stand-alone products that achieved our objectives, they are also able to provide integration across their entire suite of products and our student information system."

Michel Biagé,
Assistant Director
– Student IT Services,
University of Ottawa.

As the leading transfer and articulation software in the industry today, **Transfer Navigator** enables higher education institutions and state wide systems to attract and retain transfer students by providing a highly configurable and complete transfer evaluation solution for advisors, administrators and students.

Transfer Navigator is a Web-based application that is fully configurable to meet an institution or state wide system's requirements. By enabling students to view how transfer credits can affect their degree completion status through an interactive and intuitive interface, students can focus on their degree completion, speeding overall time to graduation. Transfer Navigator also provides a means for advisors and administrators to easily maintain the transfer database. By eliminating what used to be a lengthy process in attaining transfer credit eligibility information and approval of transfer credits, it provides advisors/administrators with the time to focus on guiding transfer students and maintaining transfer database accuracy.

More than 50 percent of students who earn bachelor's degrees, enroll at two or more institutions, and almost 20 percent enroll at three institutions during their student life cycle. Students transfer for a number of reasons, from completing a bachelor's degree after starting at community college, to leaving for a campus with a stronger reputation in the student's chosen field, to saving money by choosing a more inexpensive campus. The ever expanding number of students that have and expect to receive credit for courses taken at other institutions tells us that there is a need for the efficient and accurate management of transfer student data. Transfer Navigator is a Web-based application solution that not only meets this need but also complies to the requirements of institutions.

BENEFITS

Armed with highly configurable features, an interactive and dynamic transfer equivalence evaluation for students, integration capabilities with an existing SIS (Student Information System) and more, Transfer Navigator is a Web-based application solution that can scale to the size and requirements of any institution and/or state wide system. The following benefits describe Transfer Navigator's solution-oriented design:

Application Configurability: Transfer Navigator is fully configurable through a secure Web-based interface. Customers can configure their own workflows for online transfer approvals, improving and accelerating transfer student data collection, and analysis.

Easy-to-Use: The straightforward interface enables users with little training to start using Transfer Navigator quickly and effectively.

DECISION ACADEMIC

Integration Capability: Transfer Navigator can be integrated with Decision Academic's Degree Navigator, Catalog Navigator and Curriculum Navigator, making it easy to incorporate each product as needed without hassle and interruption to student information management. This integration capability allows administrators, advisors and students to use these products interactively to easily view and manage entire curriculums including transfer credits, student degree details and catalog information.

Credit Grant for Equivalent Course(s) Compliant: Transfer Navigator is fully compliant with institution and state wide system requirements.

Flexible: Transfer Navigator provides pricing models as a stand-alone or integrated option, offering institutions and state wide systems an adaptable solution to meet their unique requirements.

FEATURES
Transfer Navigator offers a collection of features that work together to help you efficiently manage and maintain your transfer database. These features include:

On-demand transfer equivalency tool is an interactive tool enabling the determination of possible transfer equivalences making it easier for students to evaluate their options.

Configurable user interface allows administrators and advisors to create an efficient student-facing resource which allows for greater administrative time to focus on transfer student guidance and the analysis of transfer data.

Improved student wizard enables transfer students to self-identify courses they have taken at other institutions and see how these courses might translate into equivalent courses at the destination institution.

Integration with current SIS to record transfer credits against the student academic record. This feature simplifies and enables database manageability and transfer credit data retrieval without interruption to the advisor/administrative function.

Transfer credit application capability makes the pre-admission and letter of permission attainable in less time for a more satisfying experience.

Recording of approval requests (and rejections) is easily performed and accurately documented with Transfer Navigator's request form.

Transfer Navigator is powered by the AMANDA.^edu technology framework.

Decision Academic provides innovative academic advising and curriculum management solutions that optimize the collection and management of student information. It enables institutions and state wide systems to attract more students and streamline their paths to graduation.

Decision Academic's Navigator Suite centralizes data and automates workflow to improve curriculum management. It also equips students and staff with self-service decision-making tools to easily explore the most complex transfer and degree options.

Navigator Suite is the first modern education technology platform that tightly integrates applications within the suite and other systems; drives accuracy and consistency; and enables administrators to easily manage and customize workflows, forms, terminology and many other aspects of application configuration.
